

SR1 Basic Suppressor

Exclusive sound protection concept for the semi-automatic rifle SR1 Basic: The barrel lengths of the SR1 Basic Suppressor for the use of suppressors are 500mm in the standard and 510mm in the magnum version ? the barrels have no sights, but a M15x1 muzzle thread to mount the Merkel Suppressor. Utilising the over-barrel principle of the Merkel Suppressor, the gun is only elongated by 140mm.

The use of the SR1 Basic Suppressor is also possible without a suppressor ? however, to do this, the gas removal has to be adjusted. The switch to change from normal to suppressor mode and back is safely located under the fore-end. Rifle and suppressor are perfectly adjusted to each other and work in perfect harmony.

TECHNICAL DATA

SYSTEM Semi-automatic rifle / Self-loading gas pressure system / 6 locking slugs turning head lock / 2-round magazine (+1) / Safety automatic - only fireable when properly locked / adjustable gas port

CALIBRE **Standard calibre:** .30-06 Spring. / 7x64 / 8x57IS / 9,3x62 / .308 Win. / **Magnum calibre:** .300 Win. Mag. / 7mm Rem. Mag.

TRIGGER Direct trigger

WEIGHT approx. 3,2 kg

LENGTH Overall length without suppressor 106 cm (at 50 cm barrel length) / Overall length without suppressor 107 cm (Magnum calibre, at 51 cm barrel length)

BARREL free swinging precision barrel / Muzzle thread M15x1 / with Merkel suppressor

STOCK straight comb / without cheek piece / Rubber butt plate /
Woodclasses: from 1
