

SxS Rifle 141

The 141 model is a variation of the 140 side-by-side rifle. The particularly narrow receiver and the short barrels make this gun one of the lightest side-by-side rifles in the world. The option of vertical and horizontal muzzle adjustment facilitates retrofitting a scope or changing to ammunition with a different load or bullet weight. The rifle is prepared for the fitting of a pivot mount; a driven hunt sight is supplied as standard. This compact action is the result of masterly gunmaking expertise - and rewards future owners with an exceptionally slim and responsive hunting gun.

TECHNICAL DATA

SYSTEM SxS double rifle / modified Anson & Deeley system / Steel bascule / Greener locking mechanism with double underlug locking

CALIBRE **Rifle calibre:** 7x65R / .30-06 Spring. / .30R Blaser / 8x57IRS / 9,3x74R / **Optional:** other calibres upon request
