

SxS Shotgun 60E / 65E / 61E

This functional Meisterstück is the collector's piece among the shotguns. Special feature: sidelocks made in Suhl by Merkel combine precision engineering with the explosive power of the intricately made V-springs - gems of the gunmakers art. The pay-back with these steel-propelled masterpieces is minimum shot development times and the fascination of detachable, refined sidelocks. Wood and steel are masterfully combined to form the whole unit. The overall impression is enhanced by the hand rubbed oil finish, which adds an additional lustre to the stock.

TECHNICAL DATA
